Lux Elements expands technical accessories

Leverkusen, 10.02.2020

New light rope for indirect lighting

In the current 2020 product range, Lux Elements presents the new, flexible Concept-LL-F light rope, which is made of high-quality 2-component silicone and comes in the versions "warm white" and "RGB". The product can be optimally combined with the manufacturer's hard foam products and creates a pleasant, feel-good atmosphere with its discreet light.

Due to the rectangular format measuring just 11 x 16 mm, the light rope can be precisely integrated into the tile pattern and easily adapted to curves and curved shapes. For a flush fit with the tile surface, a recess can be pre-milled in the hard foam at the factory, if required.

Concept-LL-F is suitable for providing indirect lighting in rooms from -60 to +80 degrees Celsius, for example in niches or under bench seats.
Other areas of use include the bathtub cladding with Top-Tru footboard, or the floating Lavado-Float washstands from the Lux Elements product range.

The light rope with a rating of 12 volts per running metre is dust-tight and waterproof according to IP 68. The standard supply cable with AMP/round plug is 4 m in length. Necessary accessories such as power supply units, controller, remote control and cables are also supplied by Lux Elements.
